Art Unit: 1623

In view of the newly found prior art, the Final Rejection of October 8, 2002 is hereby withdrawn in order to apply a new ground of rejection.

Claims 1-3, 6, 13-16 and 18-21 are rejected under 35 U.S.C. 102(a) as being anticipated by the International Patent No. WO 98/50045 or Hall et al (U.S. Patent no. 5,843,980).

The International Patent discloses a composition for systemic use containing a combination of an antimicrobial agent and an anti-inflammatory agent wherein antimicrobial agent is tetracycline, cephalosporin, tylosin or aminoglycoside and an anti-inflammatory agent is flunixin or dexamethasone (page 8, lines 38-43 and page 9, lines 1-11).

Hall et al disclose administering to animals water containing tetracycline and dexamethasone (column 11, lines 6-10).

The claimed compositions and methods are anticipated by the International Patent and Hall et al.

Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over the International Patent No. WO 98/50045 or Hall et al (U.S. Patent no. 5,843,980).

Each of the International Patent and Hall et al discloses a veterinary composition as described above but do not disclose said compositions with additional components. However, since additional components, such as preservatives, are well known in the art to be useful in veterinary compositions (see, for example, Hall et al, column 6, lines 45-46), a person having ordinary skill in the art at the time the instant invention

was made would have been motivated to add conventional additives to the compositions disclosed by the International Patent or Hall et al.

Applicant's arguments filed January 16, 2003 have been fully considered but they are not persuasive insofar as the above rejections relate to the claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elli Peselev whose telephone number is 703-308-4616. The examiner can normally be reached on weekdays 8.30 a.m. - 5.00 p.m..
